

UK ChemOnline

19-20 November 2020

The UK Department for International Trade (DIT), supported by ChemUK, is delighted to launch its own virtual chemical trade show this year. UK ChemOnline is in response to the postponement of many physical chemical events both in the UK and overseas due to COVID-19. We are pleased to offer a virtual booth for up to 100 UK companies to showcase their products and services and also to hold meetings with other UK chemical companies, representatives from DIT offices in British Embassies, Consulates and High Commission across the globe; as well as potential overseas buyers.

DIT are here to support any UK companies working within the chemical sector, who are currently exporting or are looking to begin their export journey.

Each exhibiting company will receive the following benefits:

- Individual, custom built and fully branded virtual booth, with space to display marketing material, company logos and any other key messaging.
- Access to a digital platform to enable you to engage and network with other UK companies and wider attendees.
- Export support from DIT representatives from the UK and from overseas.
- Networking opportunities with representatives of businesses from the UK and key international markets.
- Access to recorded and live presentations, the latest information and guidance on EU/UK transition from other Government Departments, opportunities and information on doing business in certain overseas markets.
